DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Invention I claims 1-7 and 21-23 in the reply filed on July 20, 2006 is acknowledged. The traversal is on the ground(s) that the elements of "selecting a template, a filter and a resolution object" cited in Group II are steps required for creating a report prior to processing the report (i.e. limitation) cited in Group I. This is not found persuasive because the argued elements or claim limitation do not relate the corresponding two groups. Group II does not require a creation of a report, and Group I does not require a template or a filter. Group I is drawn to the creation of a data structure which is created and stored prior to execution of a report; whereas Group II processes a report using the stored resolution object to answer prompt questions the modes of operation for the Groups are different.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 8-20 drawn to an invention nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Drawings

3. The drawings are objected to because Figure 3 presents partial views. Note 37 CFR 1.84(h). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any

Art Unit: 2168

amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Art Unit: 2168

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-7 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of independent claim 1 is directed to an abstract idea and does not present a concrete tangible result. Note the preamble of claim 1 recites "creating a report" [see: claim 1 lines 1-2], however the body of the claim does not present limitation with respect to "creating a report". The body of

Art Unit: 2168

the claim is directed to the creation of a resolution object [note: claim 1 line 6]. Claims 2-7 are rejected based on dependency.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 21-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 21, the following limitation lacks proper antecedent basis: “the resolution object” [see: claim 21 line 3].

Regarding claim 21, the following limitation lacks proper antecedent basis: “the report definition” [see: claim 21 line 4].

Regarding claim 21, the following limitation is vague: “A resolution for use as part of a computerized reporting system” [note preamble of claim]. The examiner suggests the following limitation for clarity in understanding the claim: “A resolution object for use as part of a computerized reporting system”.

Regarding claim 21, the following limitation is vague: “the resolution object comprising, the prompt object defining some or every part of the report definition” [see claim 21 lines 3-4]. The phrase is not clear and appears to omit limitation; specifically it

Art Unit: 2168

is unclear as to what elements the resolution object comprises. Claims 22-23 are rejected based on dependency.

9. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: "the creation of a report". Note the preamble of claim 1 recites creating a report, however it is unclear as to the creation of a report within the body of the claim. The body of the claim recites a "resolution object is created and stored prior to execution of a report, but is silent as to the creation of the report as recited in the preamble. Claims 2-7 are rejected based on dependency.

Response to Arguments

10. The declaration filed on January 6, 2006 under 37 CFR 1.131 is sufficient to overcome the Ruppelt reference.

Applicant's arguments with respect to claims 1-7 and 21-23 have been considered but are moot in view of the new ground(s) of rejection.
